LEEN BAJUNAID

Cybersecurity Specialist | Software Developer (React, Python, APIs)

Jeddah, Saudi Arabia (Premium Residency Holder) | +966 55 796 2836 | bajunaidleen@gmail.com
linkedin.com/in/leen-b-25646022a | github.com/leenbajunaid | leenbajunaid.github.io

PROFESSIONAL SUMMARY

Cybersecurity specialist and software developer who secures networks and builds web applications. Deploys FortiGate firewalls, network infrastructure and cabling, Wazuh SIEM, and EDR; develops React/TypeScript front ends, Python/Flask back ends, and third-party API integrations. EC-Council Certified SOC Analyst and certified Odoo 19 Project Leader.

SKILLS

Cybersecurity: Wazuh SIEM, EDR/Antivirus, Security Monitoring, Threat Detection, Incident Response, Email Security, Nmap, Wireshark, Nikto, Hydra, iptables

Networking: FortiGate (FortiOS) Firewalls, Firewall Policies, Network Segmentation, Secure Access Control, Network Cabling, Network Setup & Troubleshooting

Programming: Python, Java, JavaScript, TypeScript, SQL, PL/SQL

Web & APIs: React, React Native, Flask, Node.js, Express.js, REST APIs, Third-Party API Integration

Databases & Platforms: MySQL, Oracle Database, SQLite, Docker, Oracle APEX, Odoo 19 ERP

Operating Systems: Windows, Linux, macOS | **Languages:** Arabic (Native), English (Professional, C2)

PROFESSIONAL EXPERIENCE

Cybersecurity Specialist & Software Developer | Attar Software Engineering, Jeddah, Saudi Arabia — Dec 2025 – Present

- Deployed and configured FortiGate firewalls across office and remote sites, including security policies, network segmentation, and secure access control.
- Set up and maintained office network infrastructure, including network cabling, connectivity, and troubleshooting.
- Built centralised security monitoring on Wazuh SIEM with endpoint agents for log collection and threat detection, and rolled out antivirus/EDR to all workstations.
- Developed a hospital appointment and patient-management system with double-booking prevention, insurance-eligibility API integration, and automated SMS confirmations (Oracle APEX, PL/SQL).
- Integrated the WhatsApp Business Cloud API to automate event invitations and reminders, with delivery-status tracking.
- Developed and maintained ERP modules and internal business applications that automate manual departmental workflows.

AI & Cybersecurity Instructor | Teaching Engagement, Jeddah, Saudi Arabia — Nov 2025

- Delivered a one-week intensive course on AI and cybersecurity, covering how models are trained and applied to threat detection.
- Introduced ethical hacking concepts and how AI techniques are applied in penetration testing.

IT Security Intern | Bupa Health Care Insurance, Jeddah, Saudi Arabia — Jun 2024 – Sep 2024

- Handled email security incidents, including sender reputation verification and malicious IP blocking.
- Monitored security events, investigated proxy issues, and resolved EDR/NDR problems.

PROJECTS

- **Hythrmia — IoT Security Scanner & Device Management** (Python, Flask, React, TypeScript, MySQL, Docker): full-stack app with a React/TypeScript front end and Flask API that scans IoT devices across WiFi, Bluetooth, Zigbee, and Z-Wave for open ports, weak credentials, and outdated firmware using ARP Scan, Nmap, Hydra, and the CVE API.
- **Web Application Firewall Demonstration Platform** (Node.js, Express.js, SQLite3): interactive app demonstrating input sanitisation and header hardening with Helmet.js, DOMPurify, and JSDOM.
- **Advanced Web Security Application** (React Native, Express.js): security auditing app using Nikto, Nmap, and iptables.
- **Encryption & Decryption Web Tool** (Python, PyCryptodome): browser-based symmetric encryption tool.

EDUCATION

B.Sc. in Computer Science, Specialisation in Cybersecurity | Effat University, Jeddah, Saudi Arabia — 2021 – 2025

- **Activities:** Core Member, IEEE Club (Effat University); Volunteer, Orphan Care Association

CERTIFICATIONS & COURSES

Certified SOC Analyst (CSA) | EC-Council | 11/2026

Project Leader On-Boarding (PLO), Odoo 19 | Odoo | Credential ID: AE00002406333 | 08/2026

Courses: Generative AI: Introduction & Applications (IBM, 02/2024); Introduction to Artificial Intelligence (IBM, 02/2024); Intro to Cybersecurity Tools & Cyber Attacks (IBM, 11/2023); Java Programming: Arrays, Lists & Structured Data (Duke, 11/2023); Agile Project Management (Google, 10/2023); Modeling Software Systems using UML (CSE, 09/2023)
