Leen Bajunaid

Cybersecurity Specialist | Software Developer (React, Python, APIs)
+966 55 796 2836 | bajunaidleen@gmail.com | linkedin.com/in/leen-b-25646022a | github.com/leenbajunaid
Jeddah, Saudi Arabia | *Premium Residency Holder* | leenbajunaid.github.io

Profile

Cybersecurity specialist and software developer who secures networks and builds web applications. Deploys FortiGate firewalls, network infrastructure and cabling, Wazuh SIEM, and EDR; develops React/TypeScript front ends, Python/Flask back ends, and third-party API integrations. EC-Council Certified SOC Analyst and certified Odoo 19 Project Leader.

Experience

Cybersecurity Specialist & Software Developer **Dec 2025 – Present**
Attar Software Engineering *Jeddah, Saudi Arabia*

- Deployed and configured **FortiGate** firewalls across office and remote sites, including security policies, network segmentation, and secure access control.
- Set up and maintained office **network infrastructure**, including network cabling, connectivity, and troubleshooting.
- Built centralised security monitoring on **Wazuh SIEM** with endpoint agents for log collection and threat detection, and rolled out **antivirus/EDR** to all workstations.
- Developed a **hospital appointment and patient-management system** with double-booking prevention, **insurance-eligibility API** integration, and automated SMS confirmations (Oracle APEX, PL/SQL).
- Integrated the **WhatsApp Business Cloud API** to automate event invitations and reminders, with delivery-status tracking.
- Developed and maintained **ERP modules** and internal business applications that automate manual departmental workflows.

AI & Cybersecurity Instructor **Nov 2025**
Teaching Engagement *Jeddah, Saudi Arabia*

- Delivered a one-week intensive course on AI and cybersecurity, covering how models are trained and applied to threat detection.
- Introduced ethical hacking concepts and how AI techniques are applied in penetration testing.

IT Security Intern **Jun 2024 – Sep 2024**
Bupa Health Care Insurance *Jeddah, Saudi Arabia*

- Handled email security incidents, including sender reputation verification and malicious IP blocking.
- Monitored security events, investigated proxy issues, and resolved EDR/NDR problems.

Projects

Hythrmia — IoT Security Scanner & Device Management | *Python, Flask, React, TypeScript, MySQL, Docker*
- Full-stack app with a **React/TypeScript** front end and **Flask API** that scans IoT devices across WiFi, Bluetooth, Zigbee, and Z-Wave for open ports, weak credentials, and outdated firmware using ARP Scan, Nmap, Hydra, and the CVE API.

Web Application Firewall Demonstration Platform | *Node.js, Express.js, SQLite3*
- Interactive app demonstrating input sanitisation and header hardening with Helmet.js, DOMPurify, and JSDOM.

Advanced Web Security Application — security audits with *Nikto, Nmap, iptables* (React Native, Express.js)
Encryption & Decryption Web Tool — browser-based symmetric encryption (*Python, PyCryptodome*)

Education

Effat University **2021 – 2025**
B.Sc. in Computer Science, Specialisation in Cybersecurity *Jeddah, Saudi Arabia*

Technical Skills

Cybersecurity: Wazuh SIEM, EDR/Antivirus, Security Monitoring, Threat Detection, Incident Response, Email Security, Nmap, Wireshark, Nikto, Hydra, iptables
Networking: FortiGate (FortiOS) Firewalls, Firewall Policies, Network Segmentation, Secure Access Control, Network Cabling, Network Setup & Troubleshooting
Programming: Python, Java, JavaScript, TypeScript, SQL, PL/SQL
Web & APIs: React, React Native, Flask, Node.js, Express.js, REST APIs, Third-Party API Integration
Databases & Platforms: MySQL, Oracle Database, SQLite, Docker, Oracle APEX, Odoo 19 ERP
Operating Systems: Windows, Linux, macOS • **Languages:** Arabic (Native), English (Professional, C2)

Activities

Core Member, IEEE Club, Effat University • **Volunteer**, Orphan Care Association

Certifications

EC-Council — Certified SOC Analyst (CSA) **11/2026**
Odoo — Project Leader On-Boarding (PLO), Odoo 19 *Credential ID: AE00002406333* **08/2026**
Courses: Generative AI: Introduction & Applications (*IBM*, 02/2024); Introduction to Artificial Intelligence (*IBM*, 02/2024); Intro to Cybersecurity Tools & Cyber Attacks (*IBM*, 11/2023); Java Programming: Arrays, Lists & Structured Data (*Duke*, 11/2023); Agile Project Management (*Google*, 10/2023); Modeling Software Systems using UML (*CSE*, 09/2023)
