Leen Bajunaid

Cybersecurity Specialist | Software Developer (React, Python, APIs)
+966 55 796 2836 | bajunaidleen@gmail.com | linkedin.com/in/leen-b-25646022a | github.com/leenbajunaid
Jeddah, Saudi Arabia | *Premium Residency Holder* | leenbajunaid.github.io

Profile

Cybersecurity specialist and software developer who secures networks and builds web applications. Deploys FortiGate firewalls, segmented networks, Wazuh SIEM, and EDR, and supports GRC and compliance; develops React/TypeScript front ends, Python/Flask back ends, and API integrations. EC-Council Certified SOC Analyst and certified Odoo 19 Project Leader.

Experience

Cybersecurity Specialist & Software Developer **Dec 2025 – Present**
Attar Software Engineering *Jeddah, Saudi Arabia*

- Deployed and configured the office **FortiGate 70F** next-generation firewall: security policies, secure access control and UTM security profiles; restored antivirus inspection on the database-server policy after a licence-expiry incident.
- Integrated a **FortiGate 40F** (FortiOS 7.4) as the firewall for a residential site in **transparent (bridge) mode**, adding inline FortiGuard UTP threat protection without re-addressing the existing network.
- Configured the **office network**: VLAN segmentation separating servers from user endpoints, firewall policies between segments, static IP addressing, network cabling, and connectivity troubleshooting.
- Set up **Wazuh SIEM**: Ubuntu (WSL2) manager on a static-IP host in the server VLAN, port forwarding for agent, enrolment and API traffic (1514/1515/55000), and endpoint agents for centralised log collection and threat detection.
- Supported cybersecurity **GRC and compliance**: baseline controls (**antivirus/EDR** on all workstations, role-based access in internal apps) and formal deployment documentation with network diagrams, CLI reference and sign-off.
- Automated messaging through REST APIs from PL/SQL: the **WhatsApp Business Cloud API** for event invitations and reminders with delivery-status tracking, and an **SMS gateway API** for appointment confirmations.
- Built a **hospital appointment and patient-management system** and **ERP modules**.

AI & Cybersecurity Instructor **Nov 2025**
Teaching Engagement *Jeddah, Saudi Arabia*

- Delivered a one-week intensive course on AI and cybersecurity: how models are trained and applied to threat detection.
- Introduced ethical hacking concepts and how AI techniques are applied in penetration testing.

IT Security Intern **Jun 2024 – Sep 2024**
Bupa Health Care Insurance *Jeddah, Saudi Arabia*

- Handled email security incidents and triaged **user-reported suspicious emails** for phishing: analysed message headers, validated **SPF, DKIM and DMARC** results, verified sender reputation, and blocked malicious IPs on **Palo Alto** firewalls.
- Monitored and investigated security events on **EDR** and **NDR** platforms, and resolved EDR/NDR issues.
- Wrote **incident and problem reports** for every case, reviewed **internal server security**, and investigated proxy issues.

Projects

Hythrmia — IoT Security Scanner & Device Management | *Python, Flask, React, TypeScript, MySQL, Docker*

- Full-stack app with a **React/TypeScript** front end and **Flask API** that scans IoT devices across WiFi, Bluetooth, Zigbee, and Z-Wave for open ports, weak credentials, and outdated firmware using ARP Scan, Nmap, Hydra, and the CVE API.

Web Application Firewall Demonstration Platform | *Node.js, Express.js, SQLite3*

- Interactive app demonstrating input sanitisation and header hardening with Helmet.js, DOMPurify, and JSDOM.

Advanced Web Security Application — security audits with *Nikto, Nmap, iptables* (React Native, Express.js)
Encryption & Decryption Web Tool — browser-based symmetric encryption (*Python, PyCryptodome*)

Education

Effat University **2021 – 2025**
B.Sc. in Computer Science, Specialisation in Cybersecurity *Jeddah, Saudi Arabia*

Technical Skills

Cybersecurity: Wazuh SIEM, EDR/NDR, Antivirus, GRC & Compliance, Security Monitoring, Threat Detection, Incident Response, Phishing Analysis, Email Security (SPF, DKIM, DMARC), Nmap, Wireshark, Nikto, Hydra, iptables
Networking: FortiGate 70F/40F (FortiOS) and Palo Alto Firewalls, Transparent (Bridge) Mode, Firewall Policies, VLANs & Network Segmentation, Secure Access Control, Network Cabling, Network Setup & Troubleshooting
Programming: Python, Java, JavaScript, TypeScript, SQL, PL/SQL
Web & APIs: React, React Native, Flask, Node.js, Express.js, REST APIs, Third-Party API Integration
Databases & Platforms: MySQL, Oracle Database, SQLite, Docker, Oracle APEX, Odoo 19 ERP
Operating Systems: Windows, Linux, macOS • **Languages:** Arabic (Native), English (Professional, C2)

Activities

Core Member, IEEE Club, Effat University • **Volunteer**, Orphan Care Association

Certifications

EC-Council — Certified SOC Analyst (CSA) **11/2026**

Odoo — Project Leader On-Boarding (PLO), Odoo 19 *Credential ID: AE00002406333* **08/2026**

Courses: Generative AI: Introduction & Applications (*IBM*, 02/2024); Introduction to Artificial Intelligence (*IBM*, 02/2024); Intro to Cybersecurity Tools & Cyber Attacks (*IBM*, 11/2023); Java Programming: Arrays, Lists & Structured Data (*Duke*, 11/2023); Agile Project Management (*Google*, 10/2023); Modeling Software Systems using UML (*CSE*, 09/2023)
